ICB Project Manageme Training

Purpose:

- To describe **what 'good looks like'** in managing and delivering projects successfully.
- **To help participants understand and apply our approach to project management** – the processes and structures that we use across the ICB, health and care and Gloucestershire.
- **To develop a consistent approach** to managing projects for Gloucestershire ICB – within and across programmes.
- **To ensure that staff have the right skills and confidence in managing projects** – and understand the pathway for project specific training.
- To give the system the best possibility of **delivering our strategic** priorities and ambitions.

Training Modules & Learning Outcomes:

1. Introduction to Gloucestershire ICB Project Management
- Overview of the system and understanding the end-to-end process.

2. Scoping & Initiating a Project
- Importance of scope, resources, monitoring success, and preparing to start a project.

3. Getting Approval for a Project & Starting Up a Project
- Securing project approval, planning, risk and issue management, including business cases.

4. Delivering, Implementing, and Monitoring a Project Including Change Management
- Monitoring progress, benefits realisation, financial management, and navigating gateways.

5. Evaluating & Closing a Project
- Importance of a controlled closure and handover to Business as Usual.
